PCI Compliance

Payment Card Industry Data Security Standards (PCI DSS) are the authorised programme of security controls and processes set out by American Express, Discover, JCB International, MasterCard and Visa Inc. PCI is designed to keep your payment card data safe from exploitation.

As Partners with EIT we at Blue Scorpion take pride in adhering to the latest rules and regulatory standards set out by the industry and as such we are partners of choice for many of the largest retail brands in the UK and overseas.

IP Protect & IP Protect LITE

IP Protect LITE

Adhere to government PCI DSS regulations with the security, technology, controls and processes required by UK and International trading standards. IP Protect and IP Protect LITE secure payment transactions direct to the acquiring bank, localising the payment activity within a secure, closed network.

CABLING SOLUTIONS

eit

Supporting infrastructure comes as part of our commitment to you. Upon partnering with you to install your infrastructure, all equipment and software you need, will be configured and staged prior to launch, taking the hassle out of the technical set-up and on-site deployment to minimise disruption to your business.

COMPLIANCE

Many people don't realise that there is a legal compliance to consider if you offer public WiFi, not to mention the latest General Data Protection Regulations (GDPR) coming into force for data handling. Provide added protection for your customers and colleagues with Blue Scorpion's IP Protect PCI and WiFi solutions.
